HOME PAGE		
https://z3nthemereview.zendesk.com/hc/en-us		
Clean JS console (no errors)?	No	- Asset is not being rendered and results in a \$assets-search-svg 404 - TypeError: Cannot read property 'getBoundingClientRect' of undefined (.current-item does not exist in the page)
All page traffic in HTTPS?	Yes	-
All request URLs are known (i.e.: no requests made to questionable external parties)?	Yes	-
All async public API calls only fetch the data needed for rendering?	No	- Categories, Sections and Articles are being cached in localStorage, however every page load still generates a call to the API. This can potentially lead to rate limiting. Please consider using the cache and use sideloads to fetch the data. More info can be found here: https://developer.zendesk.com/documentation/ticketing/using-the-zendesk-api/side_loading/
Template contains public data only (i.e.: no hardcoded secrets)	Yes	-
Template contains necessary curlybars helpers only?	No	- Please consider using {{#if promoted_articles}} instead of using JS to hide the promoted articles section
All strings are / can be translated (i.e.: no hardcoded strings)?	Yes	-
Other comments?	No	-
